PROLIMIT

Summer Tech Book 2022

At Prolimit we are driven by a desire to create and build the best & innovative products. Without compromising we lead the market with superior technology, applying industry-first innovations across a range of superior quality products.

Prolimit was founded in the Netherlands, and we are represented worldwide. Since it is inception, Prolimit has been instrumental in nurturing champions in the windsurfing, kiteboarding and standup paddle arenas. Many of the world’s best athletes have found fertile ground with Prolimit, with our superior products allowing them to develop their talents.

Our product engineering and marketing is driven from our head office in the Netherlands, working closely with our R&D and Design office in Cape Town, South Africa and extend to every beach in the world. Our extended team consists of a stable of talented designers, who physically test Prolimit products onthe rugged, often challenging South African coastline, Australian heat and oceans across the world. This, along with sub-zero conditions further north in the Netherlands, ensures more product testing time across all seasons. We also collaborate with experts from the USA, Australia and Taiwan on product technology. Our long lasting and strong relationships with the best factories in the world, ensures a superior quality product line that stands apart from the rest.

IN LINE WITH NATURE

At Prolimit we care about our planet and think green.

Our aim is to reduce the carbon footprint and we strive to make our products as eco-friendly as possible. Therefore we are using specially recycled, eco-friendly raw materials and innovative techniques to minimize the impact on nature. We choose sustainability over price.

Follow us on our journey.

PROLIMIT

Production process

Prolimit products are made using innovative technologies and materials. We use these technologies and materials to be more in line with nature. Because of our wide range of products, we make use of different methods and materials. The aim is always to use the most eco-friendly method available.

Carbon black recycled

Carbon Black is a key ingredient to produce neoprene. Our eco carbon black is made from recycled tires. The tires are shredded and thereafter transformed into powdered carbon black. Unlike the traditional carbon black, this method reduces the energy consumption and the CO2 emission by 200g per wetsuit.

Limestone neoprene

We use earth mined limestone to replace petrochemicals in our neoprene. Since it comes from nature, it has less impact on the environment. In short, limestone neoprene is more comfortable, longer lasting, more eco-friendly compared to petroleum based neoprene and therefore also better for nature. Limestone neoprene products are more flexible, lighter and have exceptional thermal insulation with high stretch.

Recycled neoprene

Under high temperature and pressure the raw sheets (carbon black mixed with neoprene chips and key ingredients) become foamed rubber buns. Then they are sliced into specified thicknesses for lamination. Nowadays neoprene can be recycled under certain conditions. We hope we can fully recycle old wetsuits and other neoprene products in the near future.

Dope dyed yarns

We add the color before spinning. With this procedure in which we color the yarn without the dyeing process, we save 104L of water per kg of fabric. The advantages of dope dyeing are in line with our goal to produce products with respect for our planet.

Water based glue

The laminated neoprene sheets are cut into panels and put together to create a neoprene product such as a wetsuit. The lamination of all our wetsuits is done with water based glue, so called aqua-α. Unlike the traditional glue, the water based glue is solvent free and without chemicals (it removes 99% of the impurities). This avoids latex allergies. Don't worry! Of course the glue will not dissolve in water. We made sure that the glue is as strong as the traditional glue.

Recycled polyester

There are PET Bottles in your wetsuit. 45 plastic bottles = 1 wetsuit. A wide selection of our fabrics are knitted from polyester yarns made from recycled plastic bottles. We reduce waste and material consumption at the same time.

2022

Wetsuits

WELL DONE ON CHOOSING THE MOST
ECO FRIENDLY PRODUCT PROLIMIT HAS EVER MADE.

This product is made from NATUREPRENE and follows 5 ECO FRIENDLY STEPS.
NATURAL RUBBER FOAM: From renewable rubber tree latex FSC Certified FSC-C126859
AQUA ALPHA GLUE: Solvent free and water based glue, eliminating harmful compounds.
DOPE DYED YARNS: Using less water and energy during the pigment stage
RECYCLED POLYESTER (PET LINING): Lining made from recycled bottles.
ECO CARBON BLACK: Recycled from used tyres, giving the rubber a true black.

THE FOAM IN THIS PRODUCT IS FSC APPROVED

SUMMER EDITION

PROLIMIT

Wetsuit range

PROLIMIT

PF1

First wetsuit in the industry with an FSC approval, most sustainable wetsuit ever made. FSC (Forest Stewardship Council) is promoting environmentally appropriate products. Also including cleaner air and water. Our Prolimit PF1 series is made out of plant based rubber derived from sources that are FCS certified. Our certified neoprene is laminated with recycled polyester and a lining made out of recycled PET bottles. Lamination is done with water based glue. 20% more stretch and lighter than previously offering full freedom of movement for most extreme conditions.

Vapor

We gave our designers the total freedom. Make the best Prolimit suit ever with the best technical features. High-end materials, optimized panels and an asymmetrical front zip create ultimate freedom of movement for best performance. Thermal Rebound™ lining is directly derived from survival blankets for the protection against cold conditions. Thermal Rebound, the warmest suit ever... period.

This technology goes back to the mid 1970's where NASA developed the thermal blankets for their manned missions into space as insulation. Since 2011 the same principle is used on all major sporting events where Athletes are draped in shiny silver blankets when they finish. Hypothermia is avoided and cramped muscles is reduced. Prolimit combined NEOPRENE and laminated this on the inside with a Thermal alloy material with on top the comfortable Zodiac quick dry lining. Creating the warmest wetsuit on the market today!

Mercury ^{MEN} & Oxygen ^{WOMEN}

These are the proven concept and the most versatile winter wetsuits. The Hooded version and the TR Version feature Thermal Rebound™. Zodiac plush inside lining, FTM TAPED SEAMS seams and Neolight Duotone 550+ limestone neoprene keeps you warm and comfortable during long sessions, without being limited in movability and performance on the water. Thermal Rebound, the warmest suit ever... period.

This technology goes back to the mid 1970's where NASA developed the thermal blankets for their manned missions into space as insulation. Since 2011 the same principle is used on all major sporting events where Athletes are draped in shiny silver blankets when they finish. Hypothermia is avoided and cramped muscles is reduced. Prolimit combined NEOPRENE and laminated this on the inside with a Thermal alloy material with on top the comfortable Zodiac quick dry lining. Creating the warmest wetsuit on the market today. All Mercury wetsuits feature Zodiac and Quickdry lining to keep you warm and comfortable.

Magma

Windsurfing. We do not forget the dedicated windsurfer who really needs a suit which is 100% designed for the sport. Wider forearms, different shoulder position, carefully selected materials and windchill optimized. Made out of environmentally friendly limestone neoprene and water based glue which will prevent allergic reactions. Lined with Zodiac 2 lining, Velvet Airflex 550+ and V4Y neoprene on shoulders. Windsurfing optimized YKK V-Backzip for easy access with Classic waterseal.

Predator ^{MEN} & Flare ^{WOMEN}

Airflex 500+ limestone neoprene with triple glued and blind-stitched seams. Available in front- and backzip with waterblock collar for easy entry. A high quality wetsuit to attack any condition. The 6mm version feature bombproof FTM seals, the other versions are constructed with our Triple Glued and blindstitched technology. These wetsuits are made to last and conquer the elements. Zodiac inside, full stretch, classy looks.

Fusion ^{MEN} & Fire ^{WOMEN}

The Benchmark for midpriced wetsuits with highend performance. Carefully selected materials to create one of the most versatile wetsuits. Full stretch Airflex 500+ limestone neoprene panels where you need it in Zodiac inside plush lining and windchill optimized chest and back panels to keep you warm. The Fusion range is our most complete range with about every model available. From 6 mm GBS steamers untill 2mm flatlocked summer shorties. With this range we got you covered.

Grommet

Our Grommet wetsuit series are built for comfort and performance featuring our airflex 350+ neoprene for flex and movability, wind-chill free skin chest and back and easy entry leg cuffs. Durable wetsuits to provide fun and comfort for the younger riders.

Raider ^{MEN} & Edge ^{WOMEN}

Vertical backzip with waterblock seal. Steamer out of 5 mm neoprene and performance driven. Developed with comfort and simplicity in mind. GBS construction on the 5mm steamers for warmth. The Shortarm version feature removable arms to make them versatile in various summer conditions.

Nordic

Warm in the coldest conditions. The 4-layer lightweight waterproof breathable fabric combines a hydrophobic outer for waterproofing and hydrophilic inner membrane for keeping moisture away from the body. These suits are made out of the best materials possible. Dryzippers made for submersion conditions, dryseal cuffs on ankles and wrists made out of neoprene and when appropriate made out of latex seals and fully taped inside seams. The maximum freedom of movement is guaranteed, best to be combined with our Prolimit innersystems. Windsurfing, Kiteboarding, SUP or other watersports suited.

Inside

Zodiac2 lining

Velvet AirFlex 550+ & 500+ lining

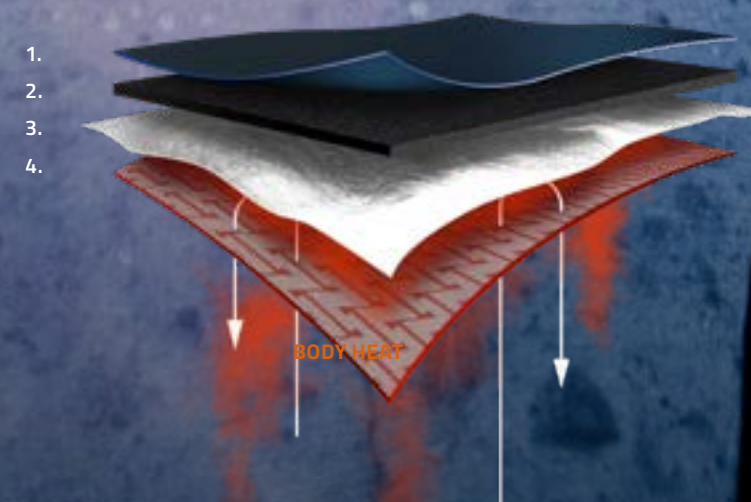

Softer than ever before, more stretch, comfortable feel and quickdry. Another milestone in wetsuit technology. Clearly recognizable because of the purple color and the feel... smooth as velvet.

Creating a thermic barrier
which rebounds your body
heat to keep you warm.

Thermal Rebound™

Thermal Rebound™ lining is directly derived from survival blankets for the protection against cold conditions. Extra protected layer between the neoprene and zodiac to reflect your body heat and to block wind chill. Keeping you comfortable, dry and light.

The **4 layer** construction Thermal Rebound lining. This technology goes back to the mid 1970's where NASA developed the thermal blankets for their manned missions into space as insulation. Since 2011 the same principle is used on all major sporting events where Athletes are draped in shiny silver blankets when they finish. This effect of survival blanket for the protection against cold conditions is now available in our neoprene wetsuits. **1.** The outer layer ensures resilient protection. **2.** Super stretchy neoprene layer provides insulation and unrestricted movement. **3.** Alloy Thermal Rebound retains and regulates body heat. **4.** A quick dry thermal fleece offers comfort enhanced by the Zodiac2plush thermal grid for optimal warmth. Extra protection layer between the neoprene and Zodiac2 to reflect body heat and to block wind chill. Patent pending nr. 15/169,749

FOOTWEAR

Predator Boot 5.5mm Round Toe GBS Armoured

The Prolimit Predator unisex boot is our warmest armored boot on the market. The armored insole protects you from sharp objects which can cut into your feet. The glued and blind-stitched seams keep the water from getting in and the 5.5mm neoprene makes sure your feet stay warm. The boot has a reinforced heel for extra support. The difference between the RT and ST is that this boot has a round toe. Available in color black, size range 36 to 47.

- FEATURES
- Armored Aramid insole

■ Smooth skin ankle seal

■ Airflex 500+ limestone neoprene

■ Heel webbing loop for easy access

■ Foot lock arch control rubber

■ GBS seams (glued and blind stitched)

■ OCL (Orthopedic controlled last)

■ Water based glue, anti-allergic, environment friendly

■ Heel lock reinforcement

■ Flexible calf panel for easy entry

Predator Boot Split Toe 5.5mm GBS Armoured

The Prolimit Predator unisex boot is our warmest armored boot on the market. The armored insole protects you from sharp objects which can cut into your feet. The glued and blind-stitched seams keep the water from getting in and the 5.5mm neoprene makes sure your feet stay warm. The boot has a reinforced heel for extra support. The difference between the RT and ST is that this boot has an internal split toe, the split toe allows you to have more balance and control. Available in color black, size range 36 to 47.

- FEATURES
- Armored Aramid insole

■ Internal split toe

■ DCS (Direct contact sole)

■ Airflex 500+ limestone neoprene

■ Heel webbing loop for easy access

■ Foot lock arch control rubber

■ GBS seams (glued and blind stitched)

PROLIMIT

**We are now
having three
categories
of harnesses
in the market.**

Prolimit harnesses

Every individual is different, long, wide, skinny, short but we share all the same components. So are harnesses. Every harness shares the same components. A bar, an inside skin, outside skin, webbing etc. But that does not mean each harness fits each person.

Some want to have a high back support, low side support, medium back support, medium side support, low back support, medium side support, very profiled, or a flatter profile, super fixed on your body or enable to slide. Some people have backproblems and for some a very stiff harness will help but for others the opposite can be true. The most expensive harness is not per definition your best harness! Prolimit makes the best harnesses.

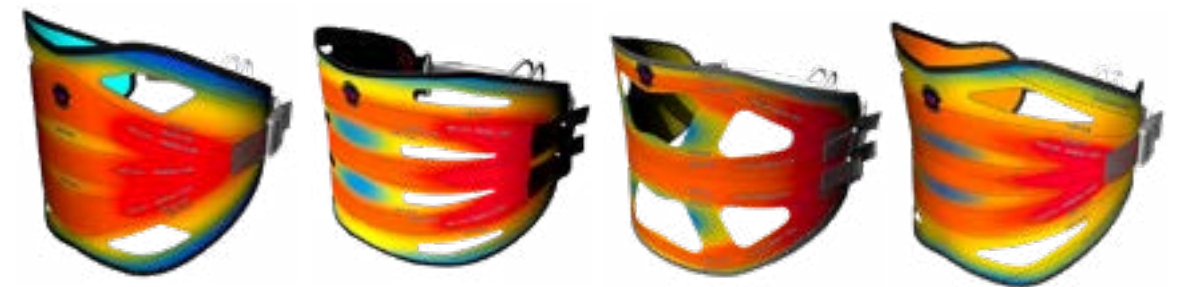

Inner structure

The inner structure of the harness determines the harness. Prolimit is using unique and different innerstructures of our harnesses so there is always the best harness for you.

3D molded compression cell foam harnesses

Molded outside and molded foam inside. Using carefully individual selected plates, heights, different stiffnesses and with neoprene soft edges. Varying from height, width, waist and personal preference. With our range we cover every single wish and demand. Our harnesses future compents to select your best harness. Varying 6 different types of shapes so you can carefully select the best harness for your use, not go for the most expensive harness, select your best harness.

Low profile 3D shaped molded waist harness with precurve with high load optimized outline profile. Comfortable neoprene inside with EVA molded pillow. The load bearing frame is built on the MARK II internal load plate. The neoprene waist belt made for comfort and grip makes it easy to take on and off. Included is a molded slide-in bar pad with the ultra rigid Fat bar gives it incredible stability. Multiple leash attachment points, patented Pin release spreaderbar and neoprene softedges eliminate chafe. Dual foam system. 4 Way MPL webbing spreaderbar. Low profile back support is all included in the VEX harness, making it the most capable harness on the market.

FEATURES

- Pre-curved and 3D shaped.
- neoprene waist belt
- Molded outside construction
- Patented pin-release PLT FAT BAR system with multistrap bar ends
- Stump nose hook with cross bar for leash attachments
- Torque window for optimized load spreading
- Dual density support pillow
- Internal load plate Mark IV
- MPL belt construction

Booms

PROLIMIT

Pro Boom

High performance boom: developed for maximum strength and functionality. Specific boom profile and monocoque construction.

- 29mm Diameter with 1.5mm wall thickness
- ROBO EVA grip
- Made from T8 Easton Alloy, 2 piece construction
- Continuous alloy front and back end to optimize stiffness.
- Double pin adjustment system for easy adjustment
- 60cm adjustment for maximum sail range coverage
- Axial boom head with integrated skinny adapter

Color	Itemcode	Sizechart
Black/Blue/Orange	407.71210.030	140-200, 160-220, 180-240, 200-260

Assault Boom

V-grip. An extruded dual alloy tube for stiffness and comfort in a smaller diameter boom. The tapered and ovalized inside section of the boom is ergonomic and reducing fatigue and arm pump. Featuring a 29mm Diameter with 1.5mm wall thickness made from T8 Easton Alloy. The Assault has 60cm adjustment for maximum sail range coverage. More power and less effort.

- Specific boom profile constructed from continuous alloy tube
- ROBO EVA grip
- 29mm tubes, T8 alloy in 1.8mm wall thickness
- Alloy Wide backend
- Double pin adjustment
- 50cm adjustment for maximum sail coverage
- 2 piece construction

Color	Itemcode	Sizechart
Black/Blue/Orange	407.71220.010	140-200, 160-220, 180-240, 200-260

Team Boom

The Team boom is featuring an RDG diameter in the grip area of 26mm. Including our new RDG cup Axial boom head on the 145. On the 160 and 175 our axial boomhead with skinny adapter.

- Monocoque construction
- ROBO EVA grip
- Narrow diameter in the grip area of 26mm (RDG)
- Manufactured from 1.8mm thick tube, for maximum stiffness
- Continuous front and back end.
- Double lever pin adjustment system
- 50cm adjustment for maximum sail coverage
- 2 piece construction
- Axial boom head with integrated skinny adapter (160)
- 145 RDM Axial Boomhead

Color	Itemcode	Sizechart
Black/Blue/Orange	407.71231.010	145-195, 160-210, 175-225

Carbon Tech Boom

Tech Carbon composite booms are stiffer than alloy and resemble the unique looks of the C-100. Full monocoque. 140 is a full RDG 24,5mm boom, other sizes feature a 26mm RDG. Continuous carbon composite front- and backend increase the stiffness.

- ROBO EVA grip
- Specific Boom Profile curve
- 24.5mm reduced diameter grip area for the 140
- 26mm reduced grip area for the other sizes
- Carbon composite 70%
- Double pin adjustment
- Axial boom head with integrated skinny adapter

Color	Itemcode	Sizechart
Black/Blue/Orange	407.71245.000	140-190, 160-220, 180-240

Carbon C100 Boom

The C100 140 is a full RDG 24,5mm boom, other sizes are 26mm RGD diameter. Continuous carbon frontend and carbon backend for the stiffest boom construction available. Wide tailends on the big sizes.

- Specific Boom Profile curve
- ROBO EVA grip
- 24.5mm reduced diameter grip area for the 140
- 26mm RDG in the other sizes
- Double pin adjustment
- Axial boom head with integrated skinny adapter
- C-100 140/160/180 with wider back end

Color	Itemcode	Sizechart
Black/Blue/Orange	407.71250.010	140-190, 160-220, 180-240

TCS Boom

They Call me Skinny. Our TCS is a full 26mm diameter boom with a continuous alloy backend. It's a performance driven wave boom. 2 piece Alloy Axial boom. Including our new RDM cup Axial boom head on both sizes

- Specific boom profile constructed from continuous alloy tube
- ROBO EVA grip
- 26mm diameter tube, T8 alloy, 1.8mm wall thickness
- Continuous aluminum front and back end.
- Double pin adjustment
- 60cm adjustment for maximum sail coverage
- Axial boom head with RDM
- RDM Axial Front-end
